## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 3-4, 6, 11 and 14 are rejected under 35 U.S.C. 102(a) as being anticipated by Handschy (U.S. Pat. No. 6,317,112).

As to claim 3, Handschy (figs. 4-6) teaches about a method for driving an electro-optical device having a pixel arranged corresponding to an intersection where a scanning line and a data line cross in a plurality of driving frames (i.e., fields) to display an image with gray scale, the method comprising the steps of: dividing each driving frames into a plurality of subframes (note in figs. 5-15, Handschy teaches each frames is divided into a plurality of subframes; see col. 10, lines 1-7); setting each pixel to an ON state or an OFF state during a first subframe (see figure 5; col. 10, lines 66 through col. 11 line 18); and controlling the pixel depending on a gray scale level of the pixel to remain in the one of the ON state and the OFF state of the first subfield in subsequent subfields, and when the pixel state changes from one of the ON state and the OFF state of the first subfield into the other of the ON state and the OFF state, maintaining the other state in all of the subsequent subfields of the corresponding driving field (see figures 5-12; col.3, lines 32-45).

Art Unit: 2675

As to claim 4, the claims differ from claim 3 by the additional limitations "feeding a binary signal for controlling the pixel to be in one of an ON state and an OFF state to the data line in a first subfield".

However, Handschy (fig. 5) teaches that data writing arrangement 14 writes each pixel using a single binary bit to establish whether the pixel is in the ON or OFF state during each of the subframes (see col. 11, lines 7-10).

As to claims 6 and 11, the claims have substantially the limitations of claims 3-4. Therefore, they are analyzed as previously discussed in claims 3-4 above.

As to claim 14, Handschy discloses an electronic equipment comprising an electro-optical device (col. 7, lines 34-43).

*Allowable Subject Matter*

3. Claims 1, 5 and 10 are allowed. In addition, claims 2, 7-9, 13 are allowed by virtue of dependency.

*Conclusion*

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2675

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
